

Seller Leads Generation Tool Set-up and Requirements

1. Enable and Configure the Tool in your Site Backend

Site backend > Seller Leads Generation Tool - Settings > select Enable & Configure

2. Locate and Copy Landing Page URL

The URL allows you the ability to link the tool in your sidebars/navigation/home page.

3. Set Up your Autoresponder Email Templates and Signature

Automated Home Valuation Is Shown AND No Automated Home Valuation Is Shown

4. Review and Edit Landing Page Attributes

Such as: page title, description, meta keywords and example address

5. Choose or Upload Landing Page Image

6. How to Locate Seller Leads Home Valuation Widget

Go to the http://docs.realgeeks.com/widgets_screencast to learn more

7. Watch Our Detailed Seller Leads “How to” Video

Go here http://docs.realgeeks.com/seller_lead_tool to watch now

8. Set Up Property Valuation Lead Assignment

Lead Manager, Settings Tab > Lead Assignment > Property Valuation tab

Notes:

* If you embed your Seller Lead widget tool, **ONCE LIVE** you'll be able to view this feature.

* If you enabled the Text Feature in Lead Manager, make sure you add an autoresponder for this lead source.
